

## MW OBLIGATIONS INTERNATIONALES

### OBJECTIVES AND INVESTMENT POLICY

The Sub-Fund qualifies as "Foreign bonds and other debt securities". The aim of the Sub-Fund is to achieve a positive performance higher than its reference indicator, the Bloomberg EuroAgg Corporate 3-5y, representative of the corporate bonds within the Eurozone with 3 to 5 years maturity, as of the 24th of February 2020. Previously, the FTSE MTS Eurozone Government Bond 3-5 Years (denominated in euro – coupons re-invested), representative of government bonds within the Eurozone. The portfolio management strategy is based on a dynamic asset allocation. The fixed income securities' selection relies on fundamental financial analysis of the issuer. The Sub-Fund is constantly invested in foreign corporate bonds to a minimum of 50% with no geographic, sector or type of securities restriction. The fixed interest and other related debt securities composing the portfolio of the Sub-Fund are rated "investment grade" (securities rated at least BBB- or equivalent by an accepted rating agency).

Jyske Bank 5% 2028	

### COMMENTS

In February, the new French Prime Minister finally succeeded in getting parliament to vote on a budget for 2025. In Germany, the conservative party won the last elections. These two factors appeased investors. On the other side of the Atlantic, however, uncertainty and even chaos have prevailed since President Trump took office on 21 January. Threats of sharp increases in customs duties against the United States' main trading partners have followed one after the other. These risks of a generalised trade war could lead to a resurgence in inflation and a slowdown in growth. The first few weeks of the new Trump administration have also been marked by a major upheaval in the geopolitical balance.

Concerns about the economy, a generalised trade war and geopolitical chaos are fuelling a high level of nervousness in the financial markets. The euphoria triggered in November by Trump's re-election has largely dissipated. In February, as in January, European stock markets (Eurostoxx 50: +3%) logically outperformed their US counterparts (S&P 500: -1.50%). This change in momentum can also be seen on the bond markets. Last month, interest rates in Europe remained stable at 2.40% for the German 10-year and fell sharply in the US: the US 10-year fell 35 bps to 4.20%.

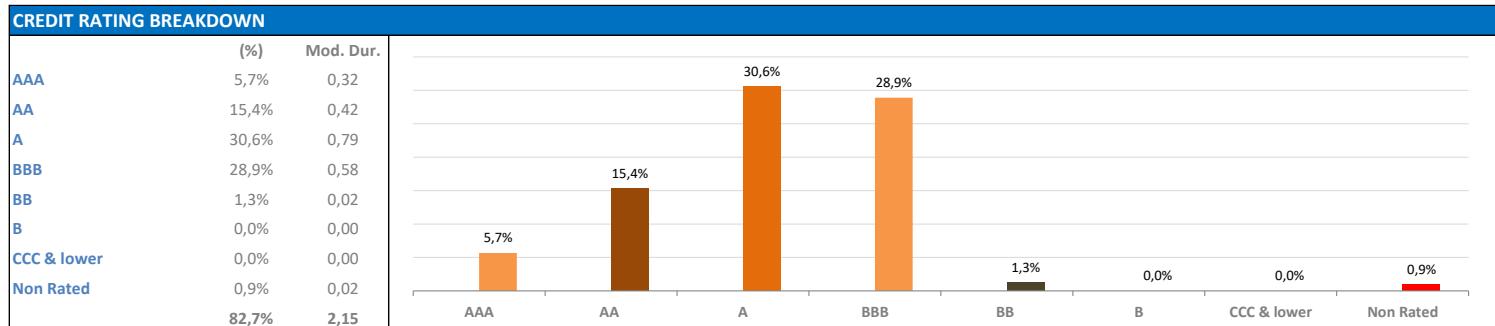

Current uncertainties are extremely high and the low level of credit risk premiums does not seem to us to reflect these potential sources of risk. So last month we maintained a prudent exposure to credit risk. This remained close to 30% compared with the euro-denominated IG market. We also maintained a neutral bias on the duration of the portfolio.
