JULY 2026

MW OBLIGATIONS INTERNATIONALES

OBJECTIVES AND INVESTMENT POLICY

The Sub-Fund qualifies as "Foreign bonds and other debt securities". The aim of the Sub-Fund is to achieve a positive performance higher than its reference indicator, the Bloomberg EuroAgg Corporate 3-5y, representative of the corporate bonds within the Eurozone with 3 to 5 years maturity, as of the 24th of February 2020. Previously, the FTSE MTS Eurozone Government Bond 3-5 Years (denominated in euro – coupons re-invested), representative of government bonds within the Eurozone. The portfolio management strategy is based on a dynamic asset allocation. The fixed income securities' selection relies on fundamental financial analysis of the issuer. The Sub-Fund is constantly invested in foreign corporate bonds to a minimum of 50% with no geographic, sector or type of securities restriction. The fixed interest and other related debt securities composing the portfolio of the Sub-Fund are rated "investment grade" (securities rated at least BBB- or equivalent by an accepted rating agency).

CLASSIFICATION SFDR - Article 8 - since 27/05/2024

COMMENTS

In June, the signing of a memorandum of understanding between the United States and Iran to end the conflict had offered tangible hopes for peace—and, by extension, the reopening of the Strait of Hormuz. In July, the resumption of hostilities reignited investor concerns. Energy prices began to rise again, fueling fears of both inflation and supply chain disruptions. In bond markets, this renewed tension led financial markets to anticipate a tightening of monetary policy by central banks, explaining the upward pressure on interest rates observed last month. Consequently, US and German 10-year yields rose by 30 basis points to 4.75% and 3.20%, respectively. Equity markets experienced some volatility in July but ended the month virtually unchanged; the S&P remained stable, while the STOXX 600 gained 1%. Resilient corporate earnings and renewed interest in AI-related infrastructure helped offset geopolitical concerns.

The widening of credit risk premiums in March led us to reduce the fund's underweight position in credit risk—relative to the euro IG market—from 25% to 40%. We have maintained this level since then. The upward pressure on rates observed during the month prompted us to increase the fund's rate sensitivity from 80% to 100% relative to that of the benchmark index.
