

MAY 2024

## MW OBLIGATIONS INTERNATIONALES

### OBJECTIVES AND INVESTMENT POLICY

The Sub-Fund qualifies as "Foreign bonds and other debt securities". The aim of the Sub-Fund is to achieve a positive performance higher than its reference indicator, the Bloomberg EuroAgg Corporate 3-5y, representative of the corporate bonds within the Eurozone with 3 to 5 years maturity, as of the 24th of February 2020. Previously, the FTSE MTS Eurozone Government Bond 3-5 Years (denominated in euro – coupons re-invested), representative of government bonds within the Eurozone. The portfolio management strategy is based on a dynamic asset allocation. The fixed income securities' selection relies on fundamental financial analysis of the issuer. The Sub-Fund is constantly invested in foreign corporate bonds to a minimum of 50% with no geographic, sector or type of securities restriction. The fixed interest and other related debt securities composing the portfolio of the Sub-Fund are rated "investment grade" (securities rated at least BBB- or equivalent by an accepted rating agency).

### COMMENTS

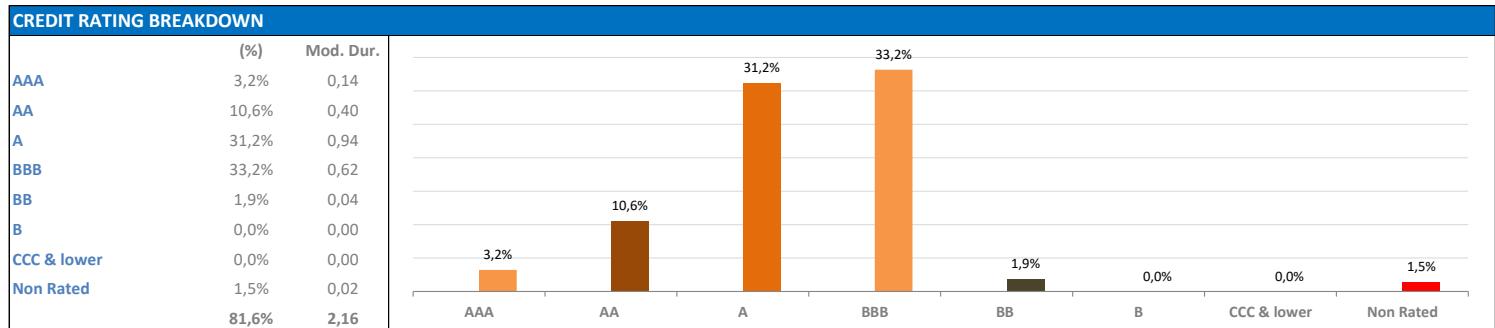

The latest economic statistics raise more questions than certainties. In the United States, doubts are emerging about the robustness of the economy. This is evidenced by the growth in the first quarter (+1.3% annualized) which shows a clear slowdown compared to previous quarters (+3.4% in Q4 2023 and +4.9% in Q3 2023). This economic downturn has not resulted in a decrease in inflation, which slightly increased during the first quarter. In the eurozone, on the other hand, there are signs of a recovery in activity, but it remains at low levels. Inflation, although lower than in the United States, remains too high, especially in the services sectors. In summary, there are many uncertainties about economic prospects as well as the monetary trajectories of central banks.

Despite these uncertainties, markets are still betting on a soft landing for economies with continued disinflation and a more accommodative monetary framework. In May, risk aversion remained very low. This benefited the stock markets, which reversed the previous month's trend with a rebound of around 3 or 4% for the main indices. In the bond markets, economic downturns explain the 20 bps drop in the 10-year US yield to 4.50%. In Europe, a slight increase of 5 bps to 2.65%.

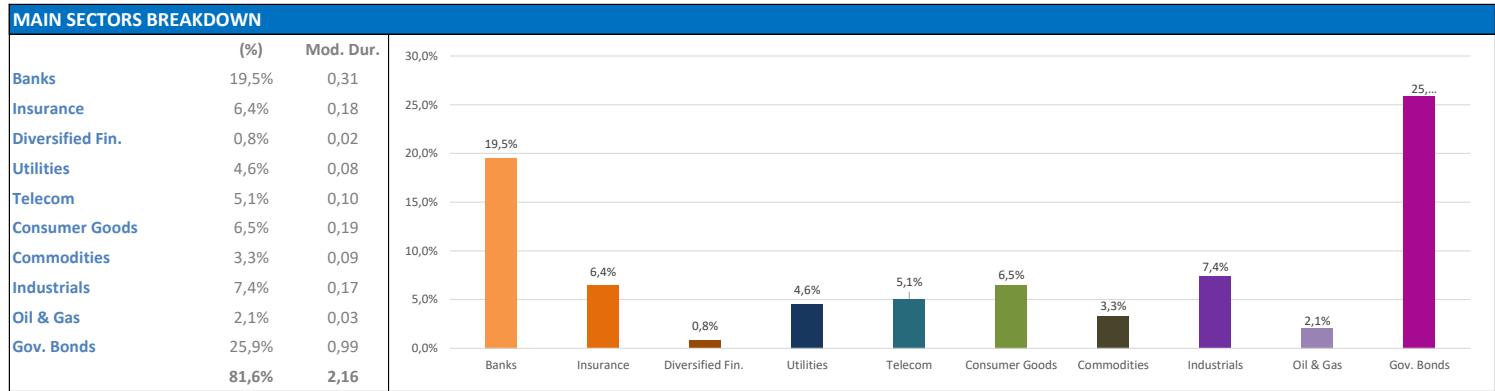

The numerous uncertainties lead us to maintain a cautious strategy on credit risk. Compared to the euro IG market, MWI's relative exposure remained close to 30%. Bond sensitivity remained close to that of the benchmark index (3.63 at the end of the month).
