COMMENTS

After long weeks of "artificial coma", the gradual lifting of containment measures allows in most countries an economic recovery. This recovery has been accompanied in most developed countries by massive government support measures (guaranteed loans, financing of partial unemployment, etc.). Facing an unprecedented increase in fiscal deficits, the main central banks have implemented asset repurchase programs of unprecedented scale and in order to ensure the proper functioning of the financial markets, the latter have opened wide the liquidity valves.

In June, this monetary support was increased by € 600 billion by the ECB and by £ 100 billion by the BOE. The Fed has reaffirmed its "unlimited" support. These announcements have enabled the financial markets to continue their rebound, like the main equity indices which rose between 2 and 5%, allowing them to erase much of the ground lost in the 1st quarter.

Over the month, the fund posted a positive performance of +1.26%, compared with + 3.06% for its benchmark index. Despite this underperformance, the fund maintains a substantial lead against its index in 2020 with a performance of + 12.94% against -4.30% for the index. In June, we integrated two new positions (Sectra and Stillfront) and sold our position on Wirecard. The fund remained fully invested (98%) with a preference for the Information Technology (24%), Industry (17%) and Finance (19%) sectors.
